

High School Dropouts 2006-07 Massachusetts Public Schools

The annual high school dropout report represents a snapshot of those students who dropped out of school in any given year. The data contained in this dropout report reflect one year of dropout data across grades nine through twelve and not a particular cohort of students across four years. This report provides annual dropout data to education leaders to develop and strengthen dropout prevention programs in the state. To serve this purpose well, the Department has made several refinements to the dropout calculations over the past few years. Some of these refinements, summarized below, make it difficult to make year-to-year comparisons.

Please note that the Department has also calculated and released graduations rates for the 2006 and 2007 cohorts that provide a more complete picture of the outcomes of high school students in Massachusetts. It is important to keep in mind that the dropout data contained in the graduation rate reports is a cohort dropout rate and shows the cumulative effect of students dropping out over four years. The graduation rate reports can be viewed at: <http://www.doe.mass.edu/infoservices/reports/gradrates/>.

In the 2006-07 school year, 11,436 or 3.8 percent of students in grades nine through twelve dropped out of school.

The fluctuation in dropout rates between 2004-05 and 2006-07 can be attributed to two significant modifications to Massachusetts' data collection in the Student Information Management System (SIMS).

In the **2005-06** school year, the Department began to cross-reference SIMS data with the General Educational Development (GED) Testing Service database. In prior school years, the Department relied solely on district notification regarding students who received their GED. As a result, the Department more accurately tracks students who drop out of high school and then earn a GED therefore decreasing the number of students who are considered final dropouts. In 2005-06 school year, the number of students reported as having earned a GED by October 1, 2006 was 1,253 compared to less than 100 in the 2004-05 school year. This refinement provides a more complete count of students who achieved a high school credential that was not possible in prior school years. Hence, part of the perceived 0.5 percentage point decrease in the dropout rate from 2004-05 (3.8%) to 2005-06 (3.3%) can be attributed to our ability to identify students who earned a GED and remove them from the dropout count.

In the **2006-07** school year, the Department modified the SIMS data element, *Enrollment Status at Time of Data Collection*. The change provides the Department with more comprehensive information on dropouts and transfers to help inform policy and programmatic decisions. In prior years, districts would report the number of students who indicated that they were transferring to another district and the Department excluded them from the dropout calculations. The new expanded dropout and transfer codes provide additional information to the Department on students' plans after leaving the district. Those students who were coded as a transfer to an in-state public school with no record of re-enrollment in another school district before

¹ Due to changes in the Student Information Management System (SIMS) summer dropouts were not included in the dropout count, therefore resulting in an underreported rate.

October 1, 2007 are now considered to be dropouts. The 0.5 percentage point increase in the dropout rate from 2005-06 (3.3%) to 2006-07 (3.8%) can be attributed to the Department's ability to determine the students who actually transfer. In fact, absent this refinement, the dropout rate for 2006-07 would have been lower than the prior year.

Figure 1: Final Enrollment Status of the 2006-07 Dropout Count

The final dropout count is based on two groups of students; summer and school year dropouts. Summer dropouts were reported in the October 1, 2006 SIMS submission as a dropout or a transfer to an in-state public school (with no record of re-enrollment) prior to the beginning of the school year, whereas school year dropouts were reported as either a dropout or as a transfer to in-state public (with no record of re-enrollment) during the school year. The number of summer dropouts increased in 2006-07 by 1,708 students as compared to the 2005-06 summer dropout count. The Department attributes the increase in the summer dropout count primarily to the previously mentioned data collection changes in the 2006-07 school year.

Figure 2: Comparison of the Summer and School Year Dropouts Composing the Total Dropout Counts in 2005-06 and 2006-07

Beginning with the class of 2003, the Department required students to meet or exceed the "Needs Improvement" threshold of both the English Language Arts and Mathematics sections of the grade ten Massachusetts Comprehensive Assessment System (MCAS) to receive a Competency Determination (CD) in order to graduate from high school with a diploma. Students who did not pass the grade ten MCAS had the opportunity to pass the MCAS through re-test opportunities before their scheduled graduation date. Among both grade eleven and grade twelve dropouts, 60.8 percent had earned a CD before dropping out of school.

Beginning in the 2003-04 school year, in compliance with the National Center for Education Statistics reporting guidelines, summer dropouts were applied to the grade in which they failed to enroll. Therefore, students who completed grade eight but did not enroll in grade nine were included in the analysis as grade nine summer dropouts.

The most significant change in the annual dropout rate was among grade nine students with an increase from 3.0 percent in 2005-06 to 3.9 percent in 2006-07. The Department attributes the majority of this increase to the number of students who completed eighth grade and who were coded as a transfer to an in-state public school and failed to enroll in grade nine.

Although the rates for both Native American and Native Hawaiian students decreased in the 2006-07 school year, it important to note that these groups were more prone to rate fluctuations due to the smaller number of enrolled students than the other race/ethnicity categories.

² In the 2003-04 school year, the Department removed the data for students expected to enroll in grade nine due to an incomplete data collection. The Department presumes that if the grade eight missing students were included in the summer dropout count, the grade nine dropout rate in 2003-04 might be slightly higher.

The state dropout rate masks the wide disparity in individual school annual dropout rates, specifically the number of schools that have dropout rates below the state rate. The following chart illustrates the distribution of school dropout rates.

⁴ As defined by the incorporation status within the Commonwealth of Massachusetts.

⁵ Only includes schools with enrollment of 75 students or more as dropout rates for schools with low enrollments are overly sensitive to small variations.

Methodology

Population

The dropout calculations were derived from the population of students enrolled in grades nine through twelve in Massachusetts public schools. High school enrollment was based on the October 1, 2006 SIMS submission. The dropout count was collected during all three SIMS submissions and then checked against data submitted by all other districts.

Definitions and Calculations

The Department applied a dropout measure that was developed by the U.S. Department of Education. A dropout is defined as a student in grades nine through twelve who leaves school prior to graduation for reasons other than transfer to another school, and does not re-enroll before the following October 1. Students considered to be dropouts were checked against data submitted by all other districts. If student dropped out and then re-enrolled in another district, the student was not considered a dropout.

The dropout count was based on two groups of students:

Summer Dropouts: Students who were reported in the October 1, 2006 submission as a dropout or a transfer to an in-state public school (with no record of re-enrollment) prior to the beginning of the 2006-07 school year.

School Year Dropouts: Students who were reported as either a dropout or a transfer to an in-state public school (with no record of re-enrollment) during the 2006-07 school year.

Beginning in the 2003-04 school year, in compliance with the National Center for Education Statistics reporting guidelines, summer dropouts were applied to the grade in which they failed to enroll. For example, a student who was reported as enrolled in grade ten at the end of the 2006-07 school year, but fails to enroll in the 2006-07 school year, was counted as a grade eleven dropout because the student completed grade ten. Although the revised 2002-03 dropout by grade data were used in this report, previous school years' dropout by grade figures have not been modified in accordance with the guidelines.

According to the U.S. Department of Education dropout measure, students who dropped out during a particular reporting year, but returned to school, graduated or received a GED by October 1 of the following year were not counted in the final dropout count; these students are referred to as returned dropouts. The final dropout count equals students who were considered to be dropouts at the end of the 2006-07 school year (preliminary dropouts) minus all returned dropouts.

Figure 1: Final Dropout Count Calculation

Final dropout count = Preliminary Dropouts – Returned Dropouts

Example for the 2006-07 school year:

State final dropout count for 2006-07 = $(3,931 + 11,432) - 3927 = 11,436$

A dropout rate is the frequency that a dropout occurs within a defined population. The Department calculates the annual dropout rate as the number of students who drop out of school over a one-year period, minus the number of returned dropouts, divided by the October 1 grade nine through twelve enrollment, and multiplied by 100. For the 2006-07 school year, the one-year period was from July 1, 2006 to June 30, 2007.

Figure 2: Annual Dropout Rate Calculation

Annual dropout rate =	$\frac{\text{Final dropout count} - \text{October 2006 Grade 9-12 enrollment}}{\text{October 2006 Grade 9-12 enrollment}} * 100$
<i>Example:</i>	
State annual dropout rate for 2006-07 =	$\frac{11,436}{298,033} * 100 = 3.8 \%$

*Starting in the 2004-05 school year, the Department credited a dropout to a school if the student who dropped out attended a school with high school enrollment. Conversely, if a grade nine summer dropout attended a school without grade nine enrollment then the dropout applies to the district only. A ninth grade summer dropout who attended a school and that had enrollment in grades six through eight then dropout would be applied to the district only.

Note: For the 2006-07 school years, schools without data indicate that data were suppressed due to a high school enrollment of under six students. For the 1998-99 through the 2005-06, school years, schools without data were either suppressed due to low enrollment or were not open for that
